

DPD-2269-61

10 April 1961

Dear Ed:

Here is all the dope I've been able to gather on the FPS-24. It turns out that there is not one on the West Coast as originally reported. There is one in operating condition in the Eglin area and it also appears that there is one at G. I., Syracuse. I will find out about that one either today or Monday.

Also enclosed is a long list of equipment as installed in two trailers delivered to LAC. I'll call the first of the week with more info.

The info on the attitude systems from MI has just arrived and is enclosed.
